## HRV HOSE-REEL VALVE G3/8 40l/min

Product manual HRVd

### Description

This compact valve has been specifically designed to operate hose and cable reels. It features a pressure compensated, knob operated speed control with integral relief valve. This is linked to a lever operated spool valve with 4 positions.

The desired speed is selected using the speed control knob, then the direction of rotation is selected using the spring centred lever. The lever can also be detented into a fourth position which allows the reel to 'free wheel' enabling the hose to be pulled off by hand. In the neutral position the reel is locked hydraulically.

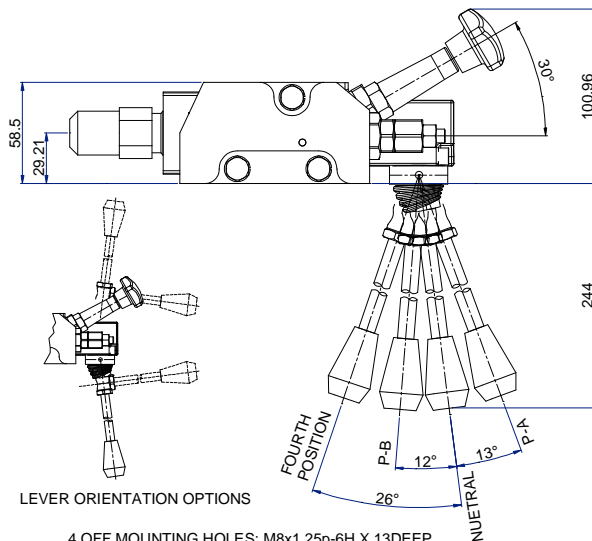

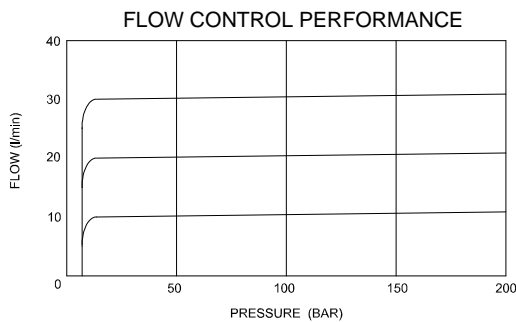

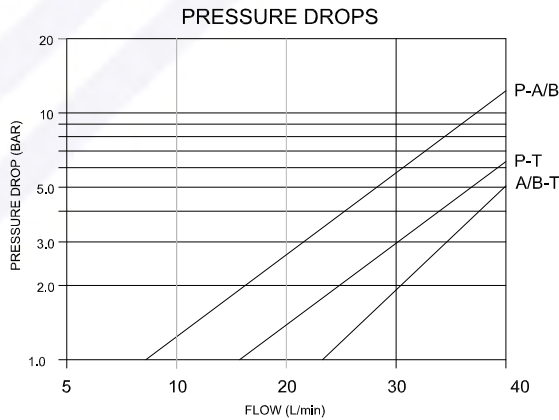

### Features

- Very compact
- Light weight
- Variable speed
- Pressure compensated maintaining constant speed irrespective of load or flow
- Adjustable relief valve
- Stainless steel lever with enclosed mechanism
- Electroless nickel-plated spool for exceptional corrosion protection and long life
- 4 bolt mounting
- Environment protected
